User Status

- self-contained measuring after briefing (Introduction for each person and each analyser is necessary!)
- commissioned measurement

Material

- Primary cells mouse, respectively _____
- Primary cells human, source (BC, Patient, Own tissue donation): _____
Are the cells HIV-, Hepatitis B and –C negative? yes no not testet
For own tissue donation the last analysis of blood has to be tested negative during the past 6 month!
- Cell lines

Safety classification (project and assignment of project leader attached)

- No safety level
- S1
- S2
- Contains bakteria, funghi,... Description: _____

Allowance for the individual devices (Status 2019)

Canto II	17€/h
LSR Fortessa (+HTS)	22€/h
LSR Fortessa A3	25€/h
Quanteon	24€/h
Sorter	60€/h
Image Stream	55€/h

The Cytometry and Cell Sorting Core Unit reserves the right to adapt the costs on the basis of the real accrued costs.
